Global News Network

LA WEEKLY

You work hard on your content and brand.
You host events, build a valuable network.

Stop giving it all away to others' platforms,
who drive your audience to your competitors,
run ads and pay you a small percentage.

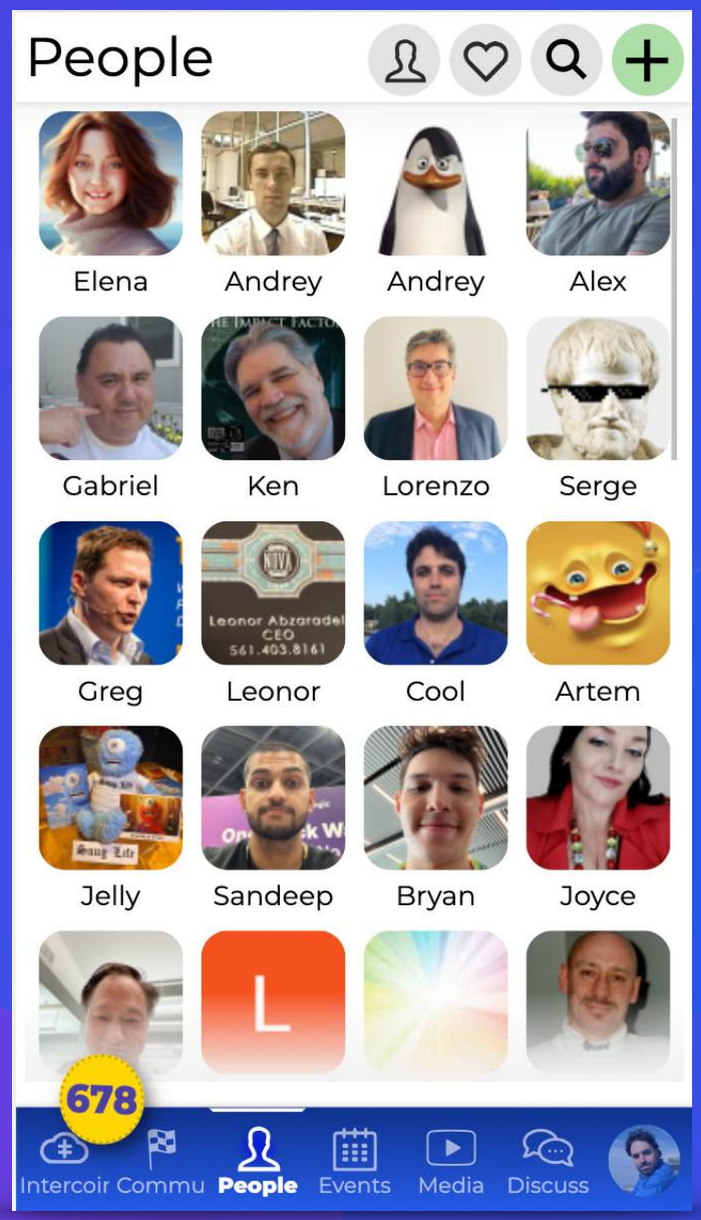
Even your URL is theirplatform.com/*you*

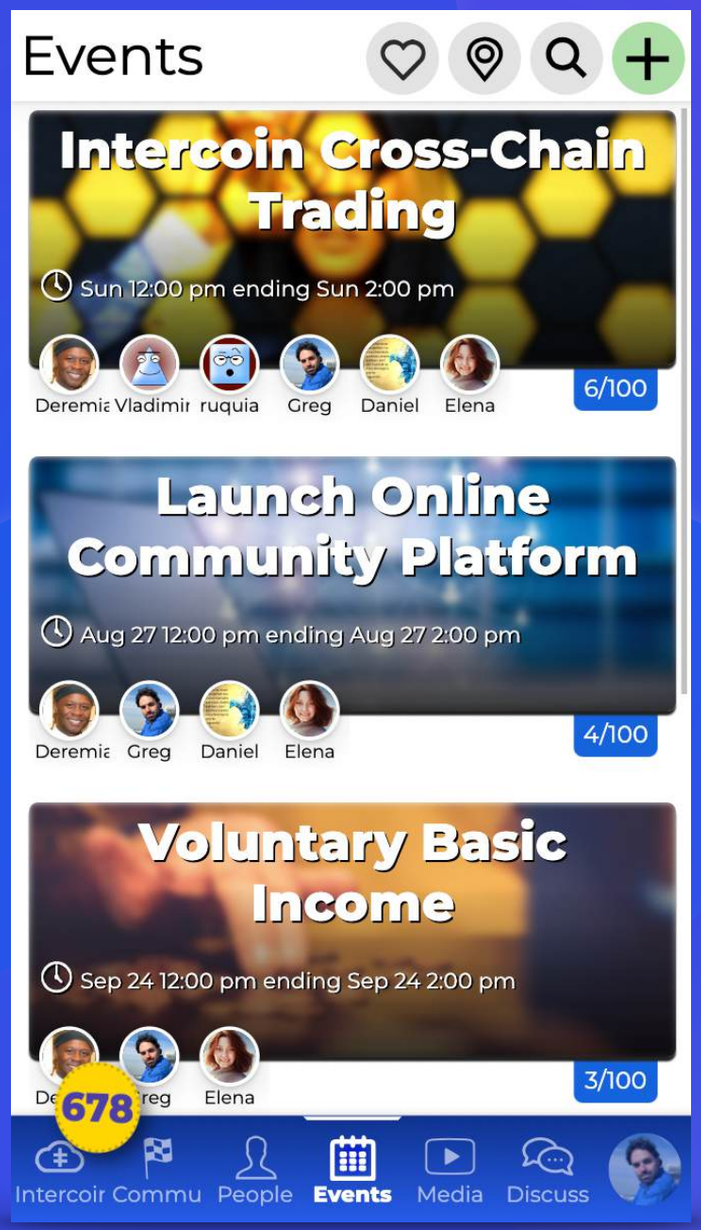
Build your own home on our open source platform.
Your community can still post short-form teasers but:

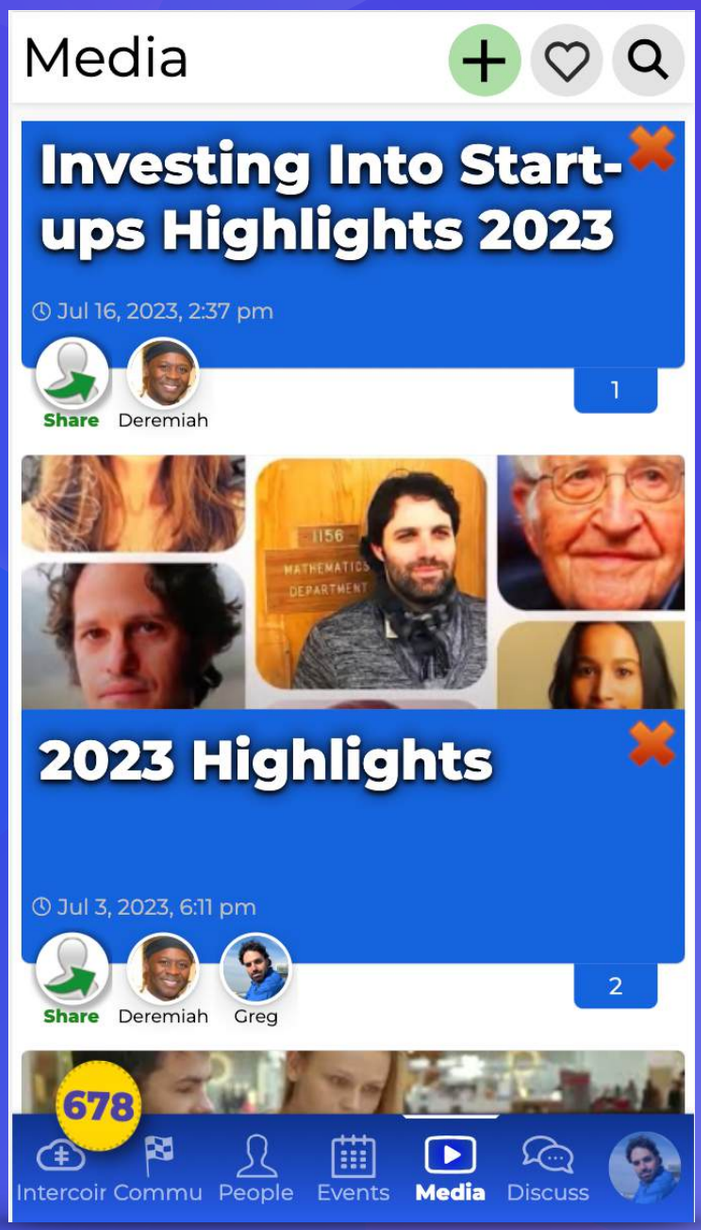
you.com

Now everything links to your central community hub.
Many choices of hosting. Never get de-platformed!

Your own, branded community app on the web.







Nothing to download. Loads nearly instantly.

1 Community Roles

Every community can set up its own set of branded roles, with different powers and abilities to grant or revoke other types of roles.

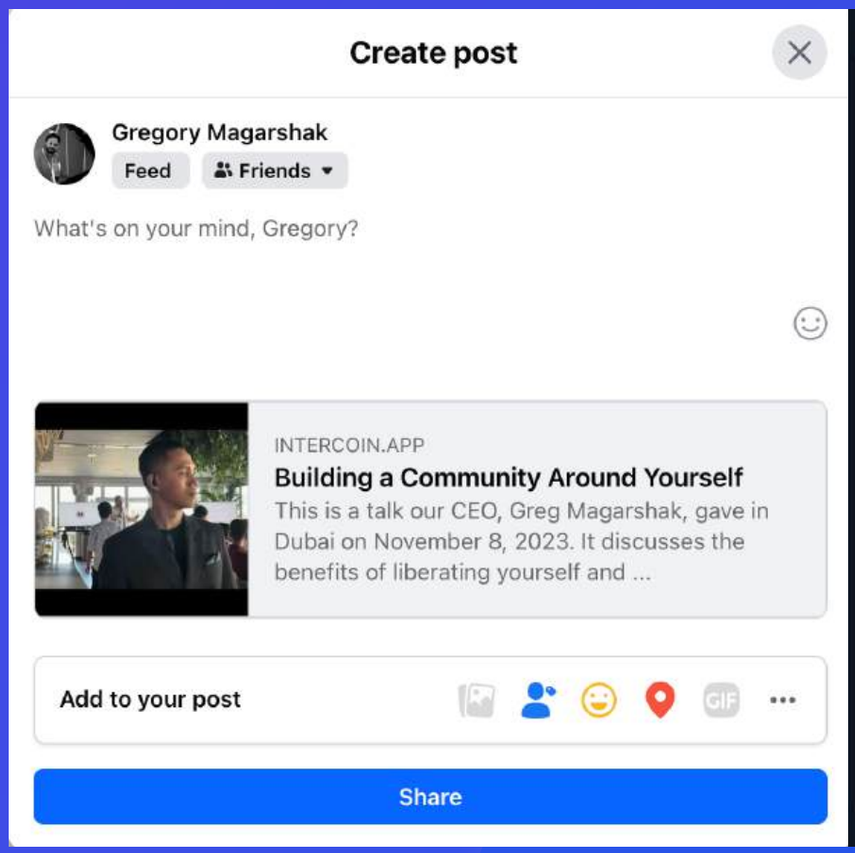
Roles can be assigned or earned for effort such as completing a course.

Role: Developer
Granted By: CTO

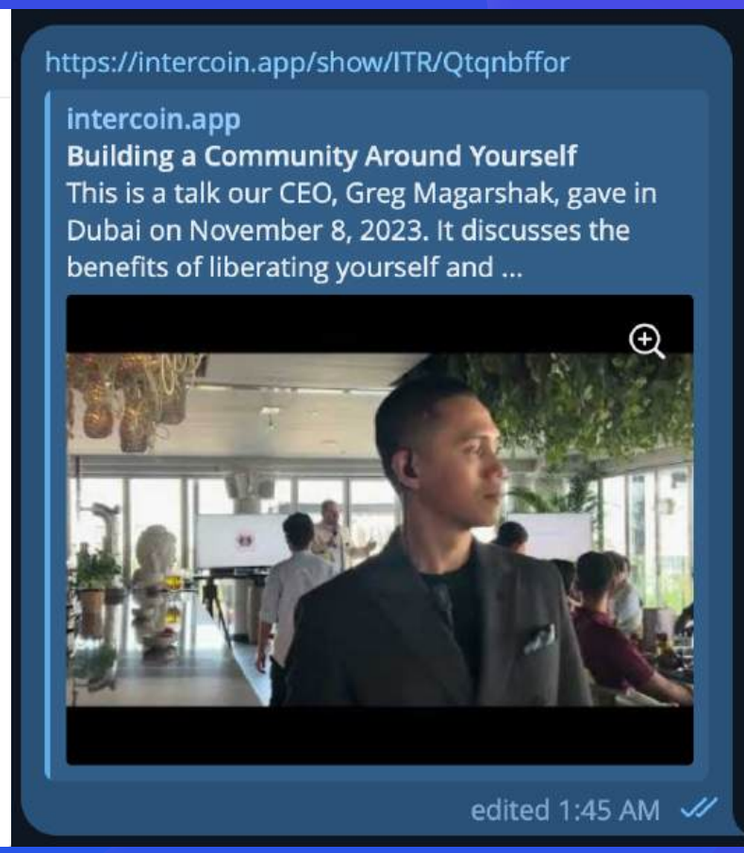
Attendees at your events and classes can connect within your own network, instead of ...

Anywhere else your members go, they can invite new guests into your community, and get rewarded growing your own platform's value instead of others.

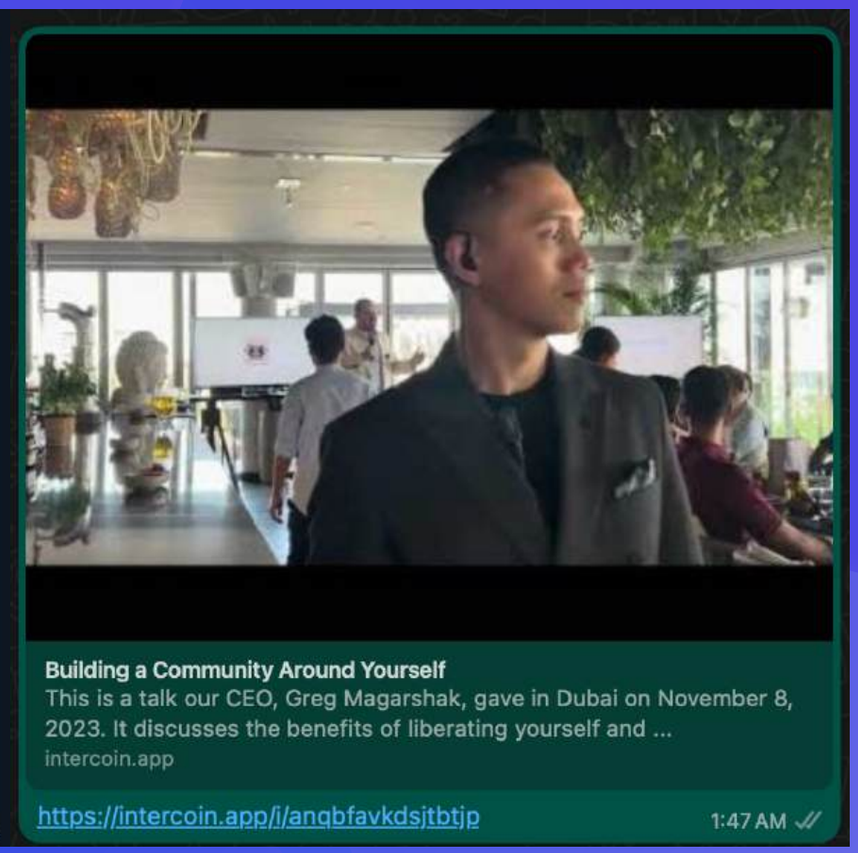
Make it easy for your members to generate clips from your long-form content and share them far and wide:



facebook



telegram



whatsapp

Each link can be tracked in order to collect metrics, and reward for inviting new people to your network.

2 Community Currencies

Don't just release your own app, but your own, branded, coin, too.

People can earn it for logging in every day, watching your content, correctly completing quizzes, making helpful contributions to your site, including inviting famous people with many followers.

You might also let them buy your coin.

@sally invited

16.1M followers
=> 161,000 coins
for @aplusk,
=> 16,100 coins
for @sally

Your coin is like loyalty points for your brand. It can be spent on things like:

- exclusive access to events & classes
- ability to access recordings afterwards
- ability to bring e.g. +2 guests to an event
- go on stage and interact with a celebrity
- post approved announcements and ads

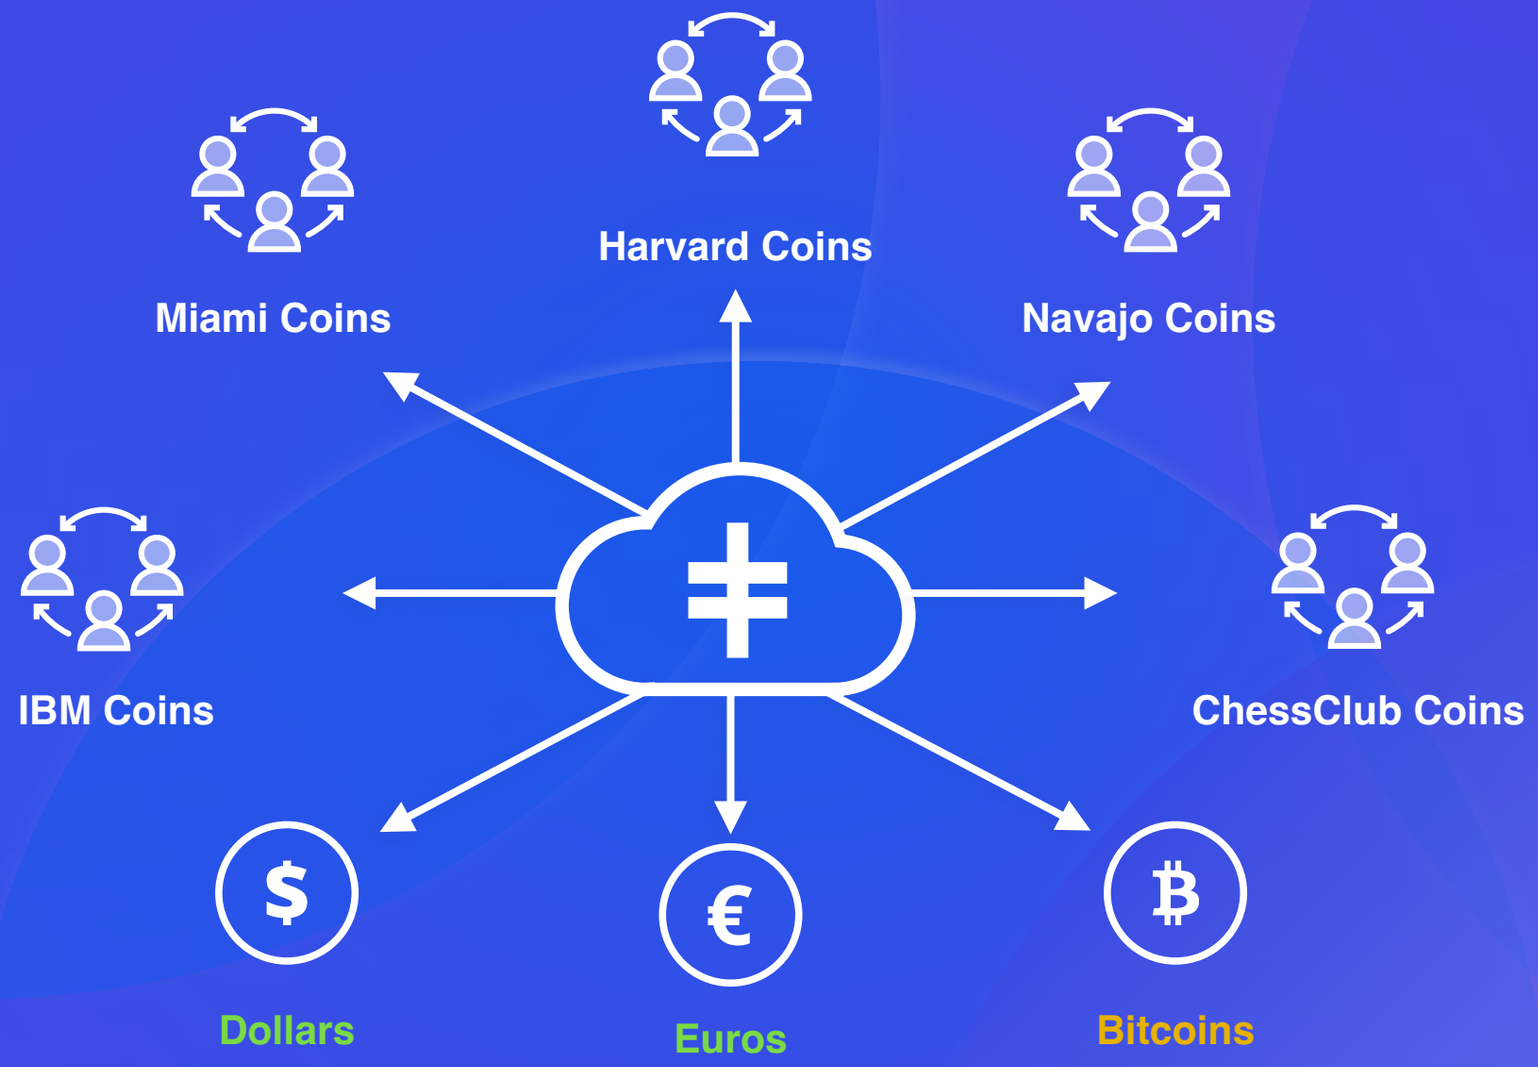
It can be transferred for things like:

- payment for services, auctions for art, etc.
- stars or endorsements for good content

It can be forfeited for things like:

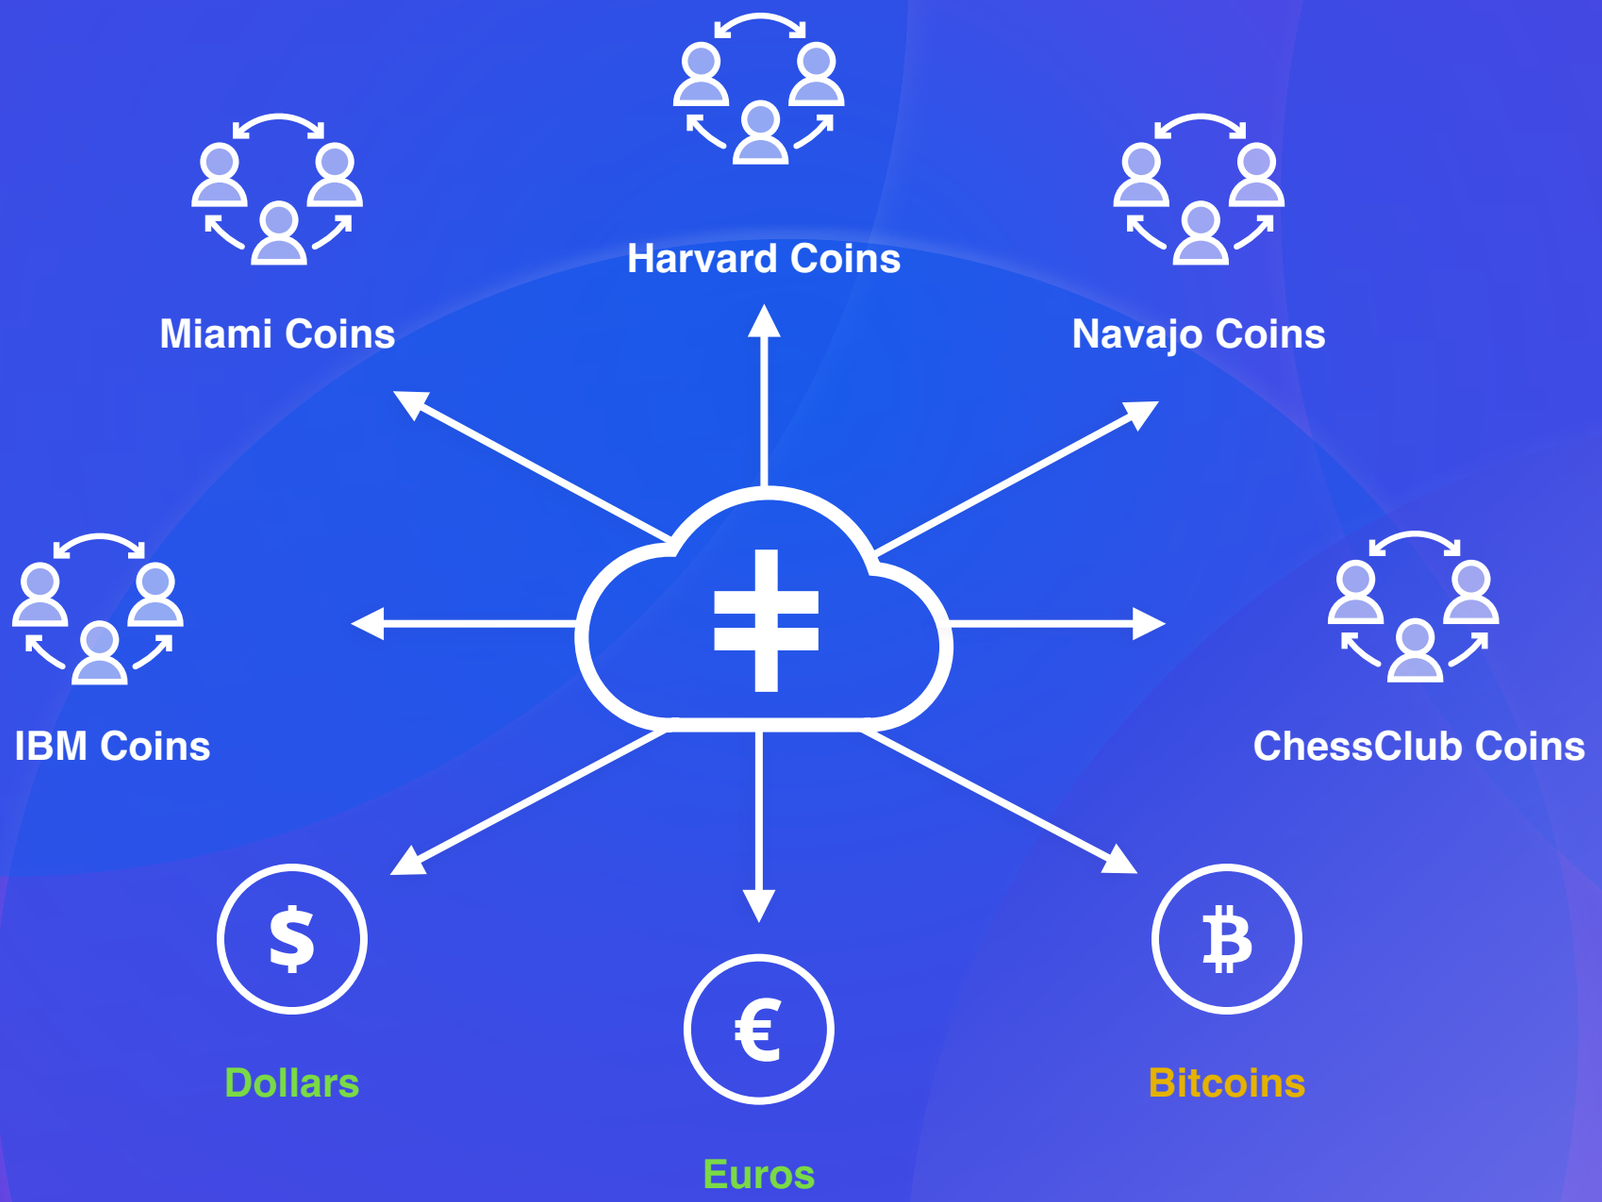
- vandalizing the community with bad content
- breaking a promise made to e.g. show up for an event or invest a certain amount of money on the blockchain

3 Currencies become interconnected



Intercoin is architected like the Internet:
acting as the bridge between local currencies.

Communities must hold Intercoin on reserve, to enable cashing out to any other currency:



Sound money. Individual choice. True democracy.

DAOs

Metaverse

The easiest way to describe Web5 is with the formula:

Web2 (social) + Web3 (decentralized) = Web5

Our Platform Integrates With:

Web3	Manage your own currency, community roles and more
Wordpress	Embed widgets and user data your existing website
Telegram	Group chats, branded bots and mini-apps, also payments
Twitter	Grow your audience with flash mobs, and rewards
Facebook	Live-streaming, hosting publicly available clips and teasers
YouTube	Live-streaming, hosting publicly available clips and teasers
Vimeo	Host and monetize exclusive video content

Why Build on Blockchain?

- Eliminate the need for members to trust a central party.
- Owners eliminate liability for securing main database.
- Factory Pattern means you can actually trust the code.

- Democratizes access for people around the world
- Anyone can fill out a simple form and produce a smart contract and widget to place on their site for:
  - Auctions • Recurring Subscriptions • NFTs
  - Contests • Payroll • Universal Basic Income
  - Escrow • Voting and Governance, and more

Sp949★★★★★

Great App. Must get it

Very helpful app

constancejb★★★★★

Highly recommended!

The most useful app I've added in a LONG time! Makes networking among my various interests and commitments- work, church, union, politics, family, sports- a snap. Love how you can generate sublists for various purposes and send them. THANK YOU!

Jlbb98★★★★☆

I like this!

This has solved a multitude of problems for me!

BaltimoreDave★★★★☆

Works the way an address book should

This is a much more usable addresss book than what Apple ships with Contacts. The GUI chrome app icon are not to my liking but what it gets very right is functionality.

kevn50★★★★★

Useful app!

Use for keeping up with youth choir email list and also for a selected family group emailings. Automatically updates with my addresses in Contacts. Very useful app!
