

Making Blockchain **Mainstream**

As seen on:

yahoo!finance

KOREA
IT TIMES
Global News Network

LAWEEKLY

Blockchain has been around for **14 years**.

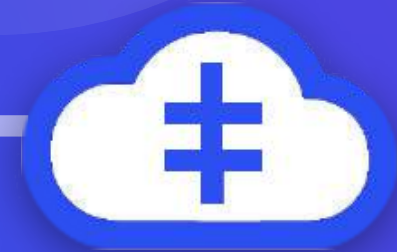

Bitcoin
2009

Ripple
2012

Ethereum
2015

Intercoin
2024

But why aren't people using it
in their **everyday transactions?**

like they use these daily

1

It must become **user friendly**

Here is a major reason why adoption is lagging:

The image displays two overlapping screenshots. The background screenshot is from Etherscan, showing a contract overview for 0x6Ef5febbD2A56FAb23f18a69d3fB9F4E2A70440B. It includes a 'Contract Overview' section with a balance of 0 Ether and an ether value of \$0.00. Below this is a 'Transactions' table with columns for Txn Hash, Method, Block, Age, From, and To. The table lists several transfer transactions. The foreground screenshot is from a mobile wallet interface, showing 'Account 3' with a balance of 0.0044 ETH (\$18.91 USD). It features buttons for 'Buy', 'Send', and 'Swap'. Below the balance, there is a section for 'Activity' with a 'Send' transaction of -0.085 ETH (\$366.22 USD) and a 'Receive' transaction of 0.1 ETH (\$430.85 USD).

The Mac made computing **mainstream** for people and organizations, with a graphical operating system, and **user-friendly apps** built on top of it.

Intercoin is making crypto **mainstream** for people and organizations, with a scalable protocol suite, and **user-friendly apps** built on top of it.

2

It must become **social**

Lonely

Intercoin has spent 5 years
building decentralized apps
designed to serve entire communities!

Launching smart contracts for **Communities** Including towns, tribes and online communities

Raised **\$50K – \$130K** per community!

Sp949 ★★★★★

Great App. Must get it

Very helpful app

constancejb ★★★★★

Highly recommended!

The most useful app I've added in a LONG time! Makes networking among my various interests and commitments- work, church, union, politics, family, sports- a snap. Love how you can generate sublists for various purposes and send them. THANK YOU!

Jlbb98 ★★★★★

I like this!

This has solved a multitude of problems for me!

BaltimoreDave ★★★★★

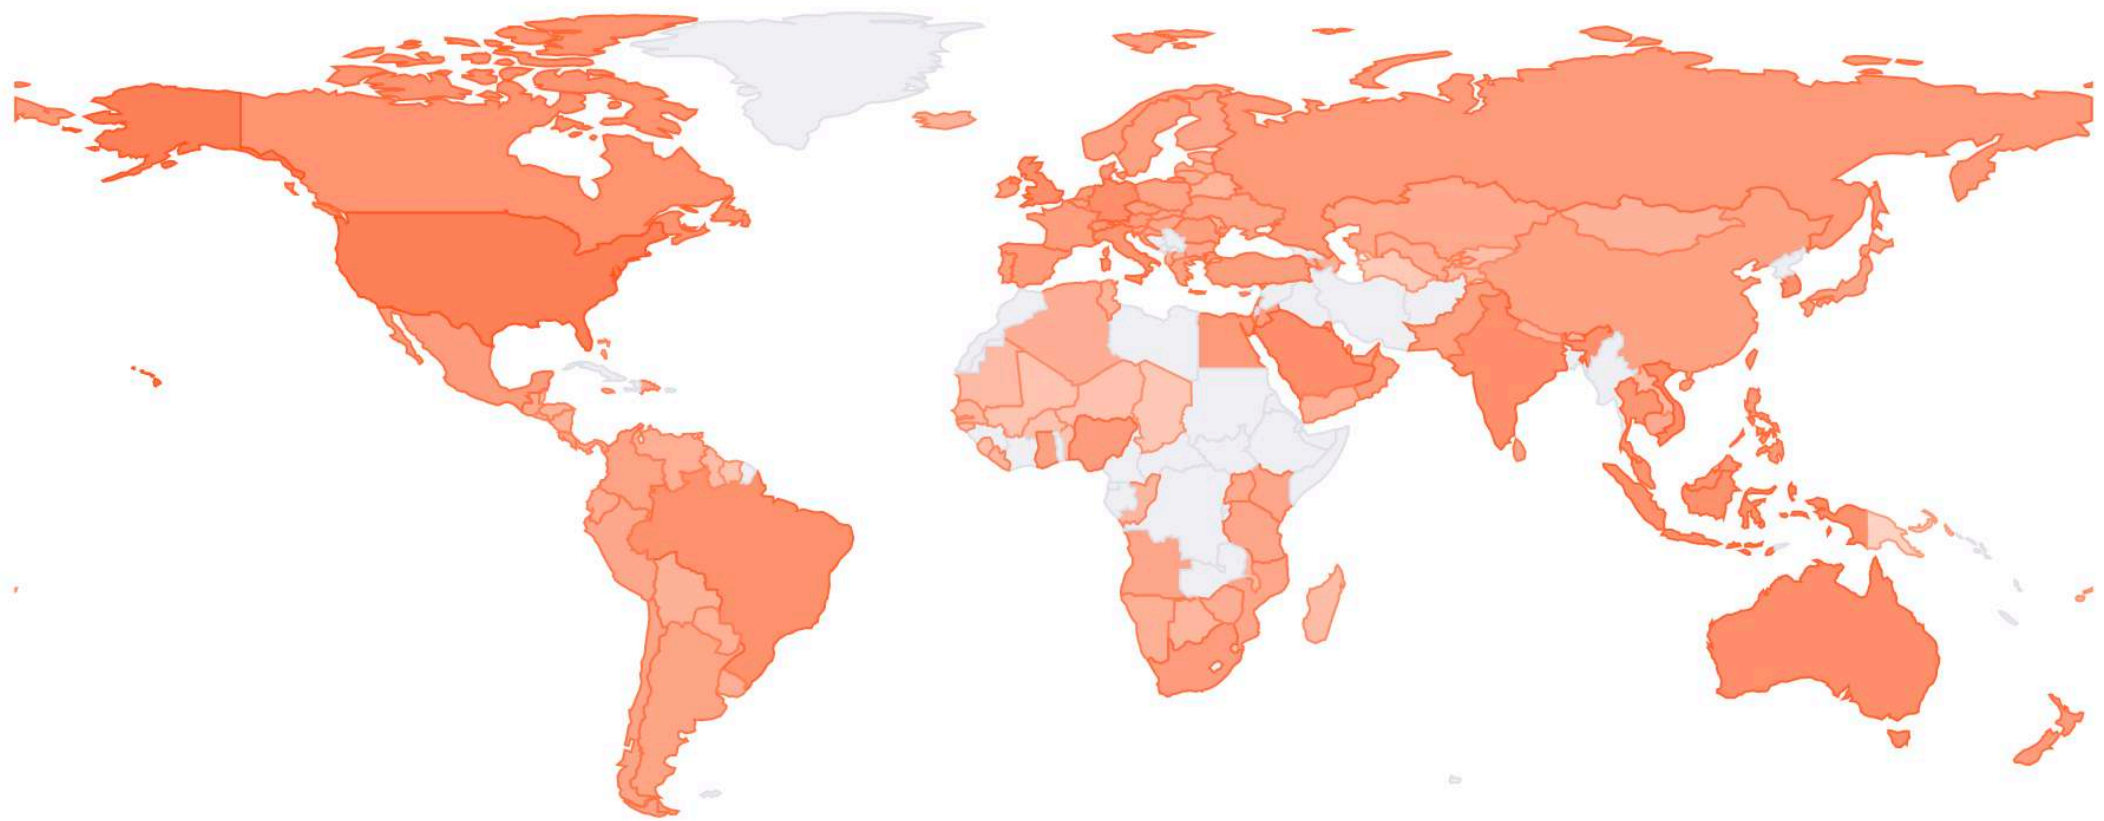

Works the way an address book should

This is a much more usable addresss book than what Apple ships with Contacts. The GUI chrome app icon are not to my liking but what it gets very right is functionality.

kevn50 ★★★★★

Useful app!

Use for keeping up with youth choir email list and also for a selected family group emailings. Automatically updates with my addresses in Contacts. Very useful app!

Let's Help You Raise Money For Your Business Through Intercoin

Democracy Dollars And Better Distribution Of Taxes With Smart Contracts

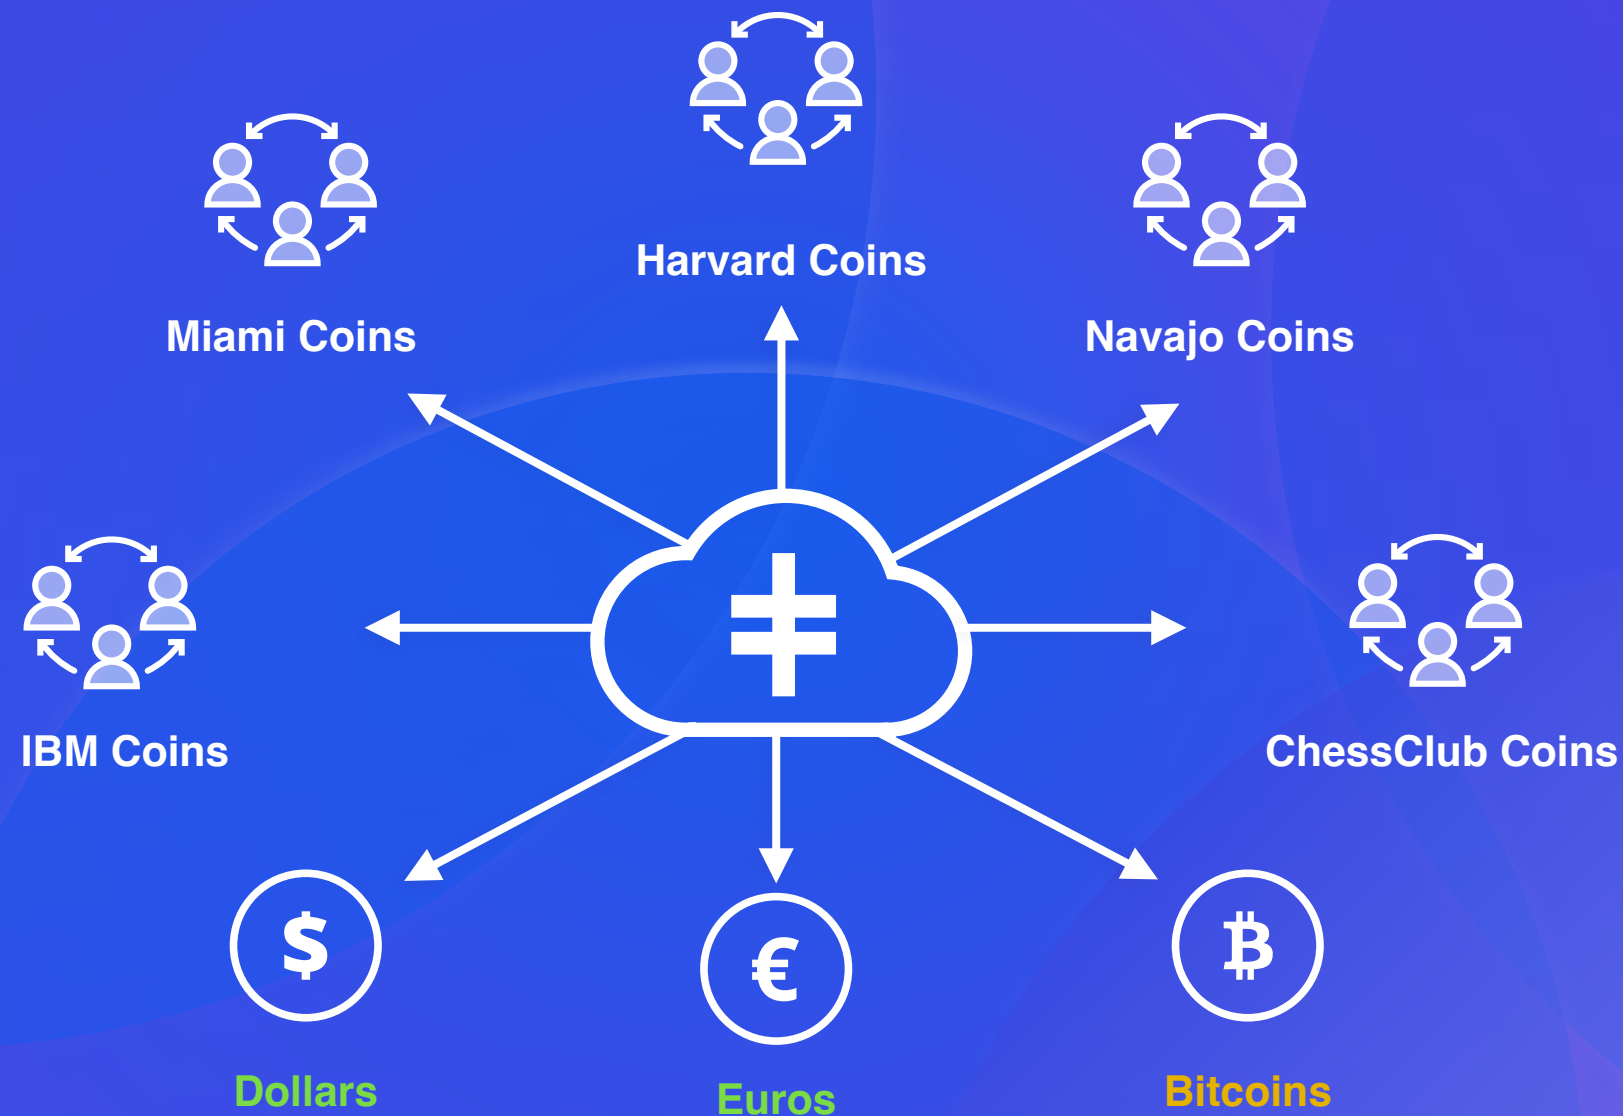

Open Source AI Meetup at Betaworks

Presenting Intercoin to the Government Blockchain Association

3

It must become **interconnected**

Intercoin is architected like the Internet:
acting as the **bridge between local currencies.**

New Apps need to be designed to solve actual problems for entire communities:

Local **Currencies** and Sustainable Commerce

Price **Statistics**, Analytics and Insights

Disbursements and Universal Basic Income

Contests and Judges to Award Prizes for Solutions

Community **Governance**, Roles, Permissions

Secure **Elections** and Decision Making

 Intercoin technology goes beyond Web3!

Web5 is about mainstream adoption and utility.

The easiest way to describe Web5 is with the formula:
Web2 (social) + Web3 (decentralized) = Web5

(recorded with permission)

Chris Swanson – mayor of Twin Peaks

Communities must hold Intercoin **on reserve**,
to enable cashing out to any other currency:

Intercoin Apps Work Together like LEGOs

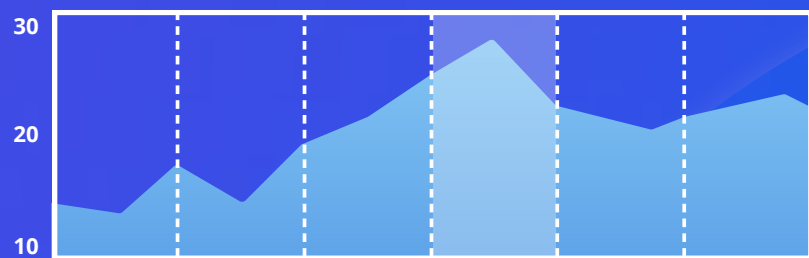

Ongoing Poll:
*Percentage of
Average Spend*

Merchant addresses are tagged with categories such as “food”.

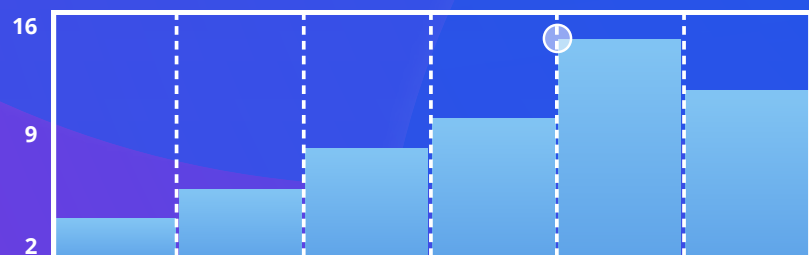

The local network calculates the average amount per time period spent on each category and generates a report.

Members are continuously polled as to how much Basic Income should be issued to subsidize each category.

**Consumer Price
Index Report:**
*Percentage of
Medium Spend*

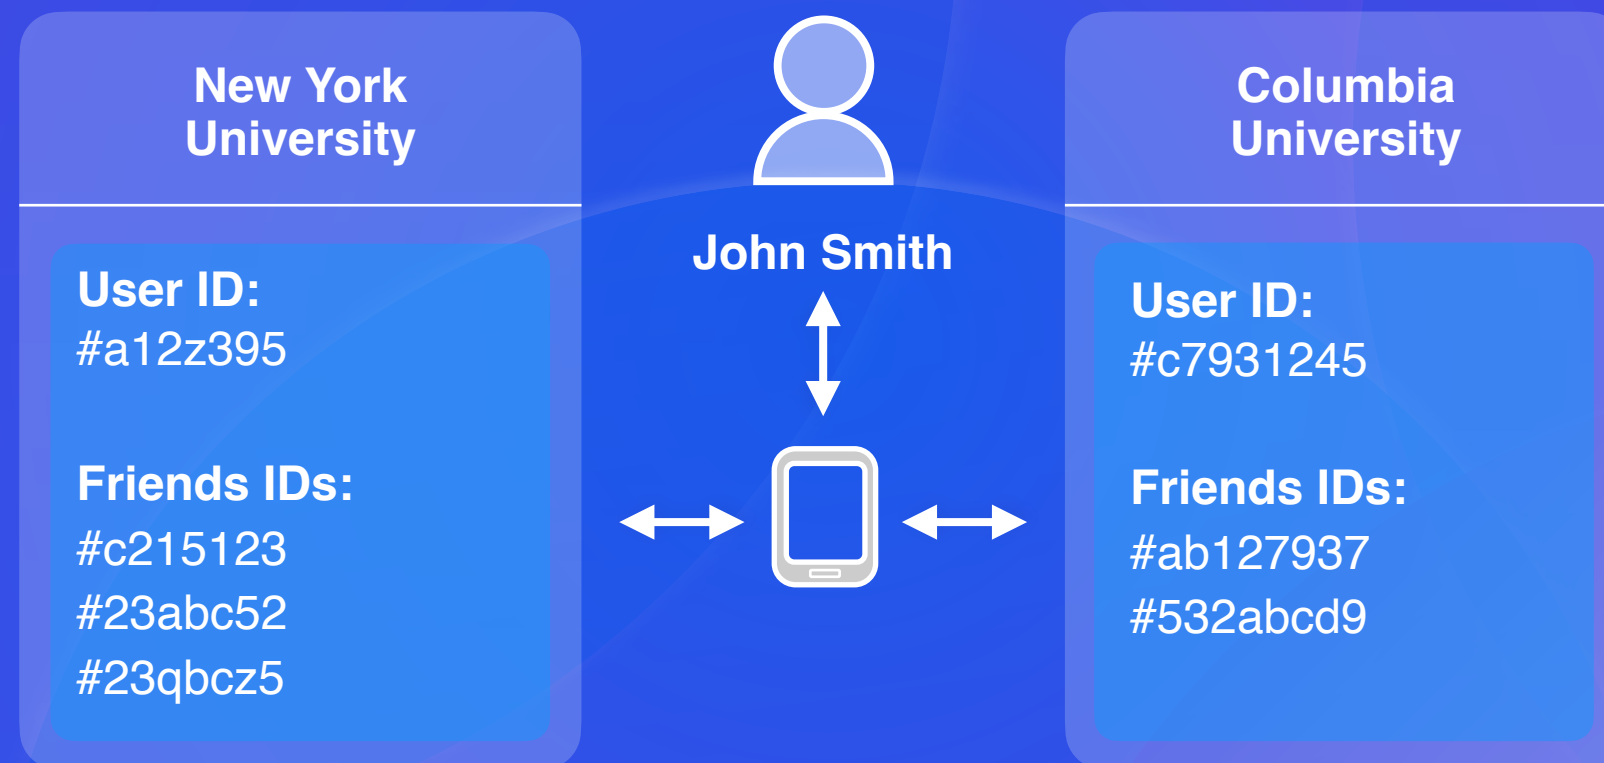

Shortage

New Coins Issued to
all Community
members for “food”

Result: end food insecurity in your community.

People can **manage their identity** across communities, and choose who to share their id and data with.

People store private keys on their own devices.
No passwords needed.

Sound money. Individual choice. True democracy.
