Intercoin

Powering Your Communities

Intercoin is building a blockchain application platform on top of the Qbix Social Platform, to enable any community to issue its own programmable money supply, and democratically manage it via disbursements, contests, governance. It also powers community voting in secure on-chain elections.

Intercoin Platform Goals
- Helps communities issue and manage their own currency for their members.
- Enables liquidity between any currency pairs, including trading currencies not issued on the Intercoin platform
- Intercoin's new Distributed Ledger Technology enables Community-based Fintech and Governance applications

Applications
- **Community · Currencies**
- **Analytics · Income · Contests**
- **Voting · Universal Basic Income**

Revenue Models
- We presell **Investor Tokens** to be exchanged for **Intercoins**, which will enable any community to issue, manage and exchange its own currency. Crypto exchanges to be listing these tokens.
- We're working to release the **Intercoin App** to be powered by Intercoin Fuel (ITRF) tokens, which we can obtain at a large discount and sell to end users.
- **Intercoin Channel** and **Community**

Target Market
- Tens of thousands of existing communities.
- Universities, Cruise Ships, Towns and Cities
- Projects and businesses looking to fund activities by pre-selling their own tokens.
- Fraternal and religious organizations.

Competitive Advantage
- We are building the **Intercoin Platform** on top of **Qbix Community App Platform**
- Ten year head start on the social platform, 500 lines of code, battle-tested and **audited by third party firms**
- User base of 50,000 community leaders
- Infrastructure of **40,000 desktop computers around the world** running our apps
- **Mayors of cities** that have allocated money to do Universal Basic Income pilots
